

## **Participant Invitation Letter**

*How necessary are hip precautions following total hip replacement?  
A review of physiotherapists' perspectives on the use of hip precautions in current  
practice.*

Dear Sir/Madam,

My name is Nyah Samson-Paton, I am a third year physiotherapy student at the University of Cumbria. The research I am presently undertaking sets out to evaluate the use of hip precautions in current practice by gathering the opinions of Physiotherapists who are, or have very recently worked within an orthopaedic setting. This will be in the form of a questionnaire, which you can complete by following the link below. The survey is voluntary and is strictly anonymous. The link will take you to an information sheet for you to read about the study, followed by a consent form which requires completion prior to undertaking the questionnaire. Once the study is complete, the findings will be made available on the ATOCP website via a link.

Thank you in advance for your contribution to this study.
