

# COMPLEX FRACTURES

**Can you help us decide the big questions that should be answered by research?**

The Orthopedic Trauma Society are conducting a James Lind Alliance Priority Setting Partnership.

We want to hear from patients, their carers/ relatives and all healthcare professionals who are involved in treating patients with complex fractures (see pictures) to prioritise the **top 10 research uncertainties**.

## We need your help:

1. Submit your research questions at:  
<http://bit.ly/ComplexFracturesSurvey>  
Between 15 Jan 2020 – 31 Apr 2020

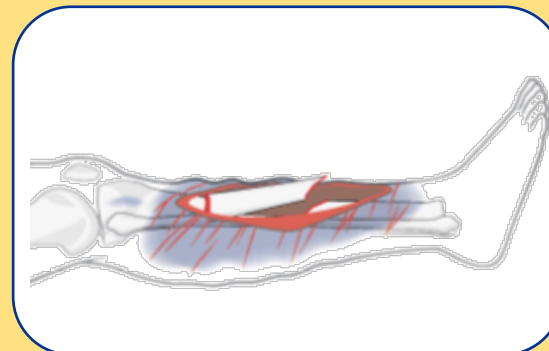

2. We seek local Champions to drive patient participation. If you have contact with affected patients in any context, please contact [christopher.bretherton@ndorms.ox.ac.uk](mailto:christopher.bretherton@ndorms.ox.ac.uk)

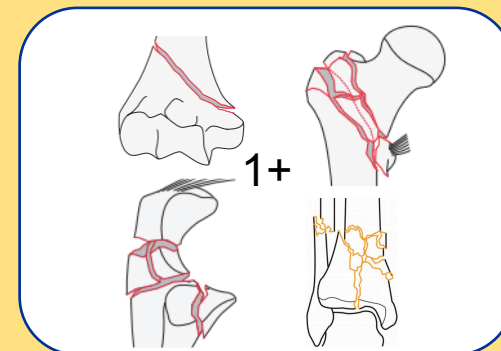

Or visit <https://www.ndorms.ox.ac.uk/complexfractures>

**We are interested in patients who have had:**

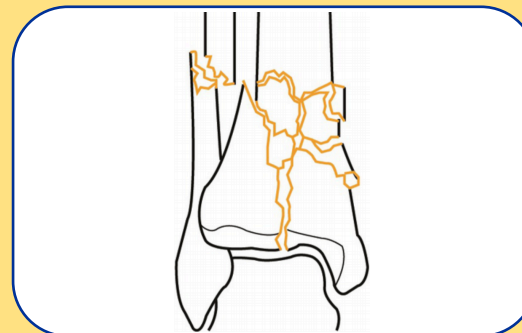

Open fractures (broken bone coming through the skin)

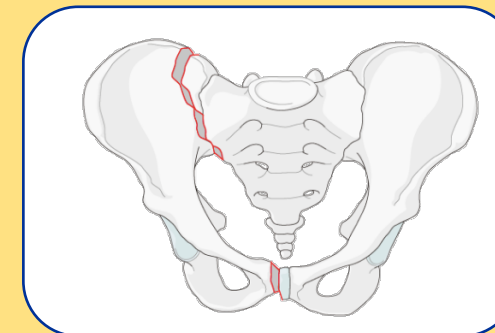

More than one fracture at the same time

Fractures to a joint of the leg broken into multiple pieces

Fractures of the pelvis or acetabulum (hip socket):

**Thank you**
